GEOTECH Company founded in 2003 with headquarters in Moscow, Russia, is the leading manufacturer and provider in Russia of world-class geophysical instruments such as Ground Penetrating Radars (GPR), Seismic stations, Electrical Exploration Systems, Explosive detectors for antiterrorist activities, etc.

GEOTECH provides geophysical surveys for oil-and –gas sector, railways, roadways, runways, capital construction objects employing Ground Penetrating Radar, Electromagnetics, Resistivity and Seismic Surveying methods.

Nuclear Quadrupole resonance (NQR) method and manufacturing safety devices concerned provides finding explosives in letters, parcels, luggage, etc.

At the moment the detectors for explosives hidden under clothes or in passengers shoes are in development.

GEOTECH has performed a lot of geophysical projects throughout Russia including geophysical services and delivery of the equipment concerned abroad. One of our goals is to promote business relations with foreign companies.
